COLLECIVETTA

PECORINO D'ABRUZZO DOP

ANALYTICAL DATA

Alcohol: 13.0–13.5% v/v

Residual Sugar: 3.5–4.5 g/L

pH: 3.20–3.30

Total Acidity: 6.0–7.0 g/L

Volatile Acidity: 0.20–0.30 g/L

FOOD PAIRINGS

Pairs well with fish-based first and main courses, white lasagna, cheeses, and white meats.

GRAPES

PRODUCTION AREA:

The vineyards are located in the municipalities of Pescosansonesco at 550 m a.s.l. and Capestrano at 450 m a.s.l., both within the Gran Sasso and Monti della Laga National Park.

VARIETY CHARACTERISTICS:

Pecorino is a native Abruzzo variety that was rediscovered in recent years thanks to the efforts of a few dedicated viticulturists. It prefers fertile soils with good water availability. The wine is characterized by pronounced citrus notes and freshness on the palate, balanced by good body and persistent flavor.

WINE

VINEYARD

100% Pecorino. Planting density: 4,200 vines/ha. Maximum yield according to regulations: 140 q/ha. Mechanical harvesting takes place in the first ten days of September.

VINIFICATION

Soft pressing followed by static decantation and cold fermentation, with very coarse lees stirring to allow the wine to mature on fine lees. Cold decantation is used for final stabilization.

AGEING

Aged exclusively in stainless steel on fine lees. Store at 14–16°C and consume preferably within 6 years of the harvest.

SENSORY ANALYSIS

Bright straw yellow. Aromas of dried yellow flowers, citrus, dried fruit, and bread crust. Lively acidity and pronounced minerality are balanced by excellent structure and a long, persistent finish.
