TESTAROSSA MONTEPULCIANO

MONTEPULCIANO D'ABRUZZO RISERVA DOP

ANALYTICAL DATA

Alcohol: 14.50 - 15.00 % v/v

Residual Sugar: 2.00 - 2.50 g/L

pH: 3.50 - 3.60

Total Acidity: 5.00 - 5.50 g/L

Volatile Acidity: 0.30 - 0.50 g/L

FOOD PAIRINGS

Braised meats, stews, game, rare steaks, and aged cheeses.

GRAPE

PRODUCTION AREA:

The vineyards are located in the municipality of Pescosansonesco at 550 meters above sea level, within the Gran Sasso and Monti della Laga National Park. The soil is characterized by a clay-loam-calcareous matrix, rich in organic matter, sloping, and exposed to the northeast. The summer climate is dry and well-ventilated.

VARIETY CHARACTERISTICS:

Montepulciano is an indigenous grape variety from Abruzzo. It thrives in clay soils, tolerates drought well, and has a late maturation. The concentration of anthocyanins is among the highest in the world. Rich in tannins, it can be astringent, especially when consumed young. The red fruit notes are notable for their intensity.

WINE

VINEYARD

100% Montepulciano, with a vine density of 4,200 plants per hectare. The yield is 135 quintals per hectare. Manual harvesting in crates occurs from late October to early November.

VINIFICATION

Red vinification: maceration and fermentation in stainless steel for 8-10 days with selected yeasts at a controlled temperature of 22-24°C. Spontaneous malolactic fermentation.

AGEING

Aged in cement vats, then 24 months in 2nd- and 3rd-passage French oak barriques, followed by further bottle aging. Best stored at 14-16°C and consumed preferably within 20 years of the harvest.

SENSORY ANALYSIS

Deep ruby red color. Aromas of ripe red fruits, with hints of withered violet and forest floor, such as plums, sour cherries, and distinctive tertiary aromas of eucalyptus, licorice, chocolate, and tobacco. The wine is warm, robust, with elegant tannins, good structure, and long persistence.
